The RESOLV-embedded integrated Graduate School Solvation Science (iGSS) offers two PhD scholarships for international graduate students in collaboration with the Graduate School Scholarship Programme of the German Academic Exchange Service (DAAD). The scholarships will be awarded in 2025 and funded by DAAD for up to 4 years.

DAAD PhD Scholarships for international graduate students at the integrated Graduate School Solvation Science within RESOLV

The iGSS seeks to attract top-level and highly motivated graduate students who will work in an inspiring and exciting research environment. The graduate program combines cutting-edge research with a curriculum of lectures, colloquia, and workshops augmented by international experiences.

YOUR OPPORTUNITIES:

- Working on a cutting-edge research topic related to the interdisciplinary field of Solvation Science and completing your doctorate degree; for more information, please refer to our website (www.solvation.de).

WHAT WE OFFER:

- You will be embedded in a high-profile research environment with access to the latest research infrastructure.
- You will be integrated within the International Faculty Solvation Science network, which includes over 20 leading research institutions worldwide, to gain international work experience during a funded 2-3-month internship.
- You will benefit from personal development opportunities, the entrepreneurial attitude within RESOLV, and a broad spectrum of lectures and transferable skills courses.
- You will enhance your science communication skills by presenting your research to the public.
- You will be provided with funding to attend international conferences.

YOUR PROFILE:

- You are fascinated by the interdisciplinary research field of Solvation Science.
- You hold an A-grade qualifying degree at Master or Diploma level from a recognized international university or are a very good Master or Diploma student in your last year of studies; degrees in Chemistry, Physics, Biochemistry, Chemical Engineering, or a related discipline will be accepted.
- At the time of the nomination (estimated January 2025), your last final exam should have taken place within the past six years. If you are still a master's or diploma student in your last year at the time of your application, you should hold an A-grade degree at the start of the scholarship.
- You have very good English language skills (equal to B2, oral and writing).
- You are a non-German citizen, and at the time of the nomination (estimated January 2025), you must not have resided in Germany for more than fifteen months (except for refugees).

The next call for applications will open on October 9th, 2024, and close on December 08th, 2024. For more information on the application rules, please refer to www.solvation.de/career/graduate-school/graduate-school-scholarship-programme/gssp-application-information/. If you have questions, please contact igss@rub.de.
