

APPLICATION FORM - 1

MASTER OF SCIENCE PROGRAM MOLECULAR SCIENCES - SPECTROSCOPY AND SIMULATION

**The application deadline for this Winter Semester 2025 program entrance at Ruhr-Universität Bochum is:
 15th of June 2025**

Please complete the required portions (*) of this form for Application Step 1, including the self-evaluation survey. Do NOT attach supplementary information at this time, and remember to sign your application.

- You may email the completed form as one PDF to: imos@rub.de
- Post-mailed applications are also accepted, see address on page 4.
- For FAQ and Program regulations, please visit rub.de/imos
- Note this MSc. program begins ONLY in the Winter Semester, October 2025, and applications are not shared with other programs.

1. PERSONAL DETAILS:

Family name:*

First name:*

Sex:* female male diverse

Date of birth:* Place of birth:*
 (day/month/year) (city/country)

Contact address:
 (street/ town/
 country)*

Telephone: Skype ID:

E-mail address:*

Home address:
 (if different from
 contact address)

Telephone:

E-mail address:

APPLICATION FORM - 1

MASTER OF SCIENCE PROGRAM MOLECULAR SCIENCES - SPECTROSCOPY AND SIMULATION

2. EDUCATION

2.1 Qualification for university entrance *

Note: Please fill in the date and place of your university entrance qualification (e.g. your high school diploma or school leaving certificate). **This does not mean the date on which you obtained your Bachelor degree.**

Date:* (day/month/year)

Place:* (city/country)

2.2 Higher education

List the colleges and universities where you have studied and describe applicable coursework for the iMOS program.

a) Undergraduate education

I have a Bachelor degree, Diplom or similar in the field of chemistry, physics, biochemistry, biology or related fields

I will receive a Bachelor degree, Diplom or similar in the field of chemistry, physics, biochemistry, biology or related fields

Name of University/College:*

Country:*

Language of instruction:*

Duration from - to:*(month/year)

Date or planned date of completion of this degree:*

Main study field:*

Final degree:*(B.Sc., B.E., B.Tech., Dipl.-Ing., etc.)

Minor or Sub study field:

Final grade or current GPA:*(numerical)

Grading system * range (best - worst):

Diploma Honors: (or grading honors, cum laude, etc.)

Relevant coursework*: Please convert credit points (CP) to the ECTS system: Expected workload for 1 year of full time studies = 1800 hours = 60 CP, therefore 1 CP = approximately 30 hours of work.

Credit Points* in Mathematics (minimum CP required = 10)

Credit Points* in Theoretical Chemistry, Physics, Spectroscopy, Quantum Mechanics or equivalent (minimum CP required = 8)

Please list the courses you have completed in Theoretical Chemistry, Physics, Spectroscopy, Quantum Mechanics or equivalent *:

APPLICATION FORM - 1

MASTER OF SCIENCE PROGRAM MOLECULAR SCIENCES - SPECTROSCOPY AND SIMULATION

b) Additional degree

- I already have a *second* Bachelor's degree, Master's degree or any other university degree in addition to the one mentioned above.
- I have previously started another degree program, but have not completed it

Name of University/College:

Country:

Language of instruction:

Duration from - to:
(month/year)

Date or planned date of completion of this degree:

Main study field:

Final degree:
(B.Sc., B.E., B.Tech.,
Dipl.-Ing., etc.)

Minor or Sub study field:

Final grade or current GPA:
(numerical)

Grading system range (best - worst):

Diploma Honors:
(or grading honors, cum laude, etc.)

3. WORK AND RESEARCH EXPERIENCE (not required for admission)

Duration from - to:(month/year)

Employer:

Short description:

Duration from - to:(month/year)

Employer:

Duration from - to:(month/year)

Employer:

Short description:

Please list any of your authored, peer reviewed journal articles here:

APPLICATION FORM - 1

MASTER OF SCIENCE PROGRAM MOLECULAR SCIENCES - SPECTROSCOPY AND SIMULATION

4. LANGUAGE SKILLS *

4.1 English language skills

To be accepted to our programme we need to have a proof that you have a sufficient knowledge of the English language. We accept the **TOEFL** or **IELTS** or an equivalent English test as a proof of your English skills.

- My previous study program was completed in English.
- I completed an English language Abitur exam.
- English is my native language.
- I took/will take the **TOEFL** as a proof of my English skills (minimum score paperbased: 600, computerbased: 250, internetbased : 100). ETS Code 7657.

Examination date:

Received points:

- I took/will take the **IELTS** as a proof of my English skills (minimum average score: 6.0).

Examination date:

Received points:

4.2 German language skills (not required for admission)

- German is my native language.
- My knowledge of German is: None Basic Intermediate Advanced

5. MOTIVATION *

Please specify briefly why you want to enroll in the iMOS programme:

6. DECLARATION *

I certify that I have answered all questions voluntarily, correctly and completely to the best of my knowledge. I realize that any intentionally false information given on my part is against the law and could lead to my exclusion from the application process or, if discovered at a later date, to my expulsion from the programme.

Date, Place (City)

Signature

Selected Specific Topics 1 / 3

Laser spectroscopy	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
NMR spectroscopy	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Mass spectrometry	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Molecular clusters	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Chemistry of nano-materials	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Coordination chemistry	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Spectroscopy	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Physical organic chemistry	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Theoretical organic chemistry	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
EPR Spectroscopy	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
X-ray Spectroscopy	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a

Selected Specific Topics 2 / 3

Surface chemistry	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Molecular interactions	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Chemical kinetics	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Ab-initio calculations	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Computational chemistry	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Quantum chemistry	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Protein-protein interactions	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Microscopic techniques	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
RNA structure, function and modification	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Theoretical biochemistry	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Biomolecular simulation	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Matrices, operators and vector spaces	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a

Selected Specific Topics 3 / 3

Basis set transformations	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Eigenvalue problems and their solutions	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Partial differentiation	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Integration over arbitrary dimensional spaces	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Differential equations and their solutions	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Statistical distributions	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Regression, data analysis and hypothesis testing	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Schroedinger equations and solutions for simple systems (Particle in the box, Harmonic oscillator, H-Atom)	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Quantum mechanics of many particle systems (Pauli principle, spin, Slater determinants, Box- Oppenheimer approximation)	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Approximate solutions to Schroedinger equation (Variational principle, perturbation theory, Hartree Fock, DFT)	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Thermodynamics (Microcanonical, canonical ensemble)	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Many body interactions (Internal coordinates, harmonic analysis, normal modes, anharmonicities)	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Condensed matter and periodic boundary conditions	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
Discretized trajectories	<input type="radio"/>	Excellent	<input type="radio"/>	Good	<input type="radio"/>	Fair	<input type="radio"/>	n/a
